Topic tags are keyword matches, a first-pass screen to be reviewed by a person.

Efficacy & clinical trials (20)

[SAMPLE] Biomarker discovery in hypertension

Singh B, Mehta C, Das M. Journal of Sample Pharmacology, 2025. PMID 90000029 | doi:10.0000/sample.1028

Background: Hypertension is a major burden. Methods: A prognostic biomarker signature was identified. Results: Synthetic results for demonstration only.

[SAMPLE] Biomarker discovery in prostate cancer & TGF-beta signalling

Verma M, Patel M, Sharma M et al. Example Clinical Reports, 2025. PMID 90000045 | doi:10.0000/sample.1044

Background: Prostate cancer is a major burden. Methods: A prognostic biomarker signature was identified. Results: Synthetic results for demonstration only.

[SAMPLE] Machine learning prediction in type 2 diabetes

Nair A, Sharma M, Patel N et al. Archive of Mock Toxicology, 2025. PMID 90000003 | doi:10.0000/sample.1002

In patients with type 2 diabetes, a random forest and deep learning model were trained. Synthetic text for demonstration only.

[SAMPLE] Randomised placebo-controlled trial in hypertension

Das R, Sharma D, Nair R et al. Journal of Sample Pharmacology, 2025. PMID 90000051 | doi:10.0000/sample.1050

In patients with hypertension, a randomised placebo-controlled phase 3 clinical trial measured efficacy. Synthetic text for demonstration only.

[SAMPLE] Biomarker discovery in asthma

Mehta A, Nair N, Rao C. Archive of Mock Toxicology, 2024. PMID 90000042 | doi:10.0000/sample.1041

In patients with asthma, a prognostic biomarker signature was identified. Synthetic text for demonstration only.

[SAMPLE] Machine learning prediction in hypertension

Patel N, Sharma C, Khan R et al. Annals of Demo Medicine, 2024. PMID 90000035 | doi:10.0000/sample.1034

In patients with hypertension, a random forest and deep learning model were trained. Synthetic text for demonstration only.

[SAMPLE] Pharmacokinetic modelling in asthma

Mehta C, Khan N, Khan N. Placeholder Bioinformatics, 2024. PMID 90000052 | doi:10.0000/sample.1051

In patients with asthma, pharmacokinetic parameters including clearance and half-life were estimated. Synthetic text for demonstration only.

[SAMPLE] Pharmacokinetic modelling in hypertension

Sharma V, Verma N, Patel R. Annals of Demo Medicine, 2024. PMID 90000039 | doi:10.0000/sample.1038

In patients with hypertension, pharmacokinetic parameters including clearance and half-life were estimated. Synthetic text for demonstration only.

[SAMPLE] Randomised placebo-controlled trial in Alzheimer disease

Das K, Sharma B, Sharma K. Example Clinical Reports, 2024. PMID 90000036 | doi:10.0000/sample.1035

In patients with Alzheimer disease, a randomised placebo-controlled phase 3 clinical trial measured efficacy. Synthetic text for demonstration only.

[SAMPLE] Randomised placebo-controlled trial in type 2 diabetes

Das K, Das S, Das B. Synthetic Biology Letters, 2024. PMID 90000014 | doi:10.0000/sample.1013

[SAMPLE] Receptor signalling pathway in asthma

Sharma B, Sharma K. Example Clinical Reports, 2024. PMID 90000032 | doi:10.0000/sample.1031

In patients with asthma, the mechanism of receptor signalling was dissected. Synthetic text for demonstration only.

[SAMPLE] Receptor signalling pathway in prostate cancer

Sharma A, Khan R, Singh K et al. Example Clinical Reports, 2024. PMID 90000040 | doi:10.0000/sample.1039

[SAMPLE] In vitro randomised placebo-controlled trial in prostate cancer

Das S, Singh C, Singh D. Example Clinical Reports, 2023. PMID 90000046

In patients with prostate cancer, a randomised placebo-controlled phase 3 clinical trial measured efficacy. Synthetic text for demonstration only.

[SAMPLE] Randomised placebo-controlled trial in rheumatoid arthritis

Nair R, Iyer M, Singh R et al. Annals of Demo Medicine, 2023. PMID 90000015 | doi:10.0000/sample.1014

In patients with rheumatoid arthritis, a randomised placebo-controlled phase 3 clinical trial measured efficacy. Synthetic text for demonstration only.

[SAMPLE] Randomised placebo-controlled trial in rheumatoid arthritis

Verma A, Singh M, Nair B et al. Journal of Sample Pharmacology, 2023. PMID 90000054 | doi:10.0000/sample.1053

In patients with rheumatoid arthritis, a randomised placebo-controlled phase 3 clinical trial measured efficacy. Synthetic text for demonstration only.

[SAMPLE] Randomised placebo-controlled trial in prostate cancer

Singh K, Sharma B, Nair C. Archive of Mock Toxicology, 2022. PMID 90000060 | doi:10.0000/sample.1059

In patients with prostate cancer, a randomised placebo-controlled phase 3 clinical trial measured efficacy. Synthetic text for demonstration only.

[SAMPLE] Receptor signalling pathway in rheumatoid arthritis

Singh V, Singh D, Iyer V et al. Synthetic Biology Letters, 2022. PMID 90000047 | doi:10.0000/sample.1046

In patients with rheumatoid arthritis, the mechanism of receptor signalling was dissected. Synthetic text for demonstration only.

[SAMPLE] Biomarker discovery in type 2 diabetes

Patel B, Mehta N, Nair V et al. Journal of Sample Pharmacology, 2020. PMID 90000033 | doi:10.0000/sample.1032

Background: Type 2 diabetes is a major burden. Methods: A prognostic biomarker signature was identified. Results: Synthetic results for demonstration only.

[SAMPLE] In vitro pharmacokinetic modelling in rheumatoid arthritis

Nair N, Rao A, Mehta D et al. Archive of Mock Toxicology, 2019. PMID 90000019 | doi:10.0000/sample.1018

In patients with rheumatoid arthritis, pharmacokinetic parameters including clearance and half-life were estimated. Synthetic text for demonstration only.

[SAMPLE] Randomised placebo-controlled trial in hypertension

Singh N, Nair C, Khan A et al. Annals of Demo Medicine, 2018. PMID 90000024 | doi:10.0000/sample.1023

In patients with hypertension, a randomised placebo-controlled phase 3 clinical trial measured efficacy. Synthetic text for demonstration only.

Pharmacokinetics (6)

[SAMPLE] Biomarker discovery in hypertension & TGF-beta signalling

Verma S, Khan N, Verma M. Example Clinical Reports, 2025. PMID 90000012 | doi:10.0000/sample.1011

In patients with hypertension, a prognostic biomarker signature was identified. Synthetic text for demonstration only.

[SAMPLE] Biomarker discovery in rheumatoid arthritis

Patel S, Singh A, Verma D et al. Annals of Demo Medicine, 2025. PMID 90000004 | doi:10.0000/sample.1003

In patients with rheumatoid arthritis, a prognostic biomarker signature was identified. Synthetic text for demonstration only.

[SAMPLE] Pharmacokinetic modelling in hypertension & TGF-beta signalling

Rao N, Verma C, Sharma N et al. Annals of Demo Medicine, 2024. PMID 90000023 | doi:10.0000/sample.1022

In patients with hypertension, pharmacokinetic parameters including clearance and half-life were estimated. Synthetic text for demonstration only.

[SAMPLE] Receptor signalling pathway in Alzheimer disease

Khan S, Sharma N, Rao R et al. Example Clinical Reports, 2024. PMID 90000057 | doi:10.0000/sample.1056

Background: Alzheimer disease is a major burden. Methods: The mechanism of receptor signalling was dissected. Results: Synthetic results for demonstration only.

[SAMPLE] Receptor signalling pathway in asthma

Sharma V, Patel K, Patel M et al. Archive of Mock Toxicology, 2022. PMID 90000043 | doi:10.0000/sample.1042

In patients with asthma, the mechanism of receptor signalling was dissected. Synthetic text for demonstration only.

[SAMPLE] Machine learning prediction in prostate cancer

Sharma A, Rao S, Patel M et al. Archive of Mock Toxicology, 2019. PMID 90000011 | doi:10.0000/sample.1010

In patients with prostate cancer, a random forest and deep learning model were trained. Synthetic text for demonstration only.

Safety & toxicity (17)

[SAMPLE] Hepatotoxicity signal detection in hypertension

Singh A, Mehta C, Verma B. Example Clinical Reports, 2025. PMID 90000022 | doi:10.0000/sample.1021

In patients with hypertension, safety and hepatotoxicity were assessed. Synthetic text for demonstration only.

[SAMPLE] Hepatotoxicity signal detection in prostate cancer

Das S, Iyer A, Sharma C et al. Journal of Sample Pharmacology, 2025. PMID 90000016

In patients with prostate cancer, safety and hepatotoxicity were assessed. Synthetic text for demonstration only.

[SAMPLE] Mutagenicity assessment in prostate cancer

Sharma D, Patel D, Verma C. Placeholder Bioinformatics, 2025. PMID 90000041 | doi:10.0000/sample.1040

Background: Prostate cancer is a major burden. Methods: Genotoxicity and mutagenic potency were compared. Results: Synthetic results for demonstration only.

[SAMPLE] Mutagenicity assessment in rheumatoid arthritis

Iyer K, Singh M, Iyer R. Annals of Demo Medicine, 2025. PMID 90000048 | doi:10.0000/sample.1047

In patients with rheumatoid arthritis, genotoxicity and mutagenic potency were compared. Synthetic text for demonstration only.

[SAMPLE] Hepatotoxicity signal detection in Alzheimer disease

Verma D, Khan B. Placeholder Bioinformatics, 2024. PMID 90000008 | doi:10.0000/sample.1007

In patients with Alzheimer disease, safety and hepatotoxicity were assessed. Synthetic text for demonstration only.

[SAMPLE] Mutagenicity assessment in prostate cancer

Patel S, Nair S, Das K et al. Synthetic Biology Letters, 2024. PMID 90000005 | doi:10.0000/sample.1004

Background: Prostate cancer is a major burden. Methods: Genotoxicity and mutagenic potency were compared. Results: Synthetic results for demonstration only.

[SAMPLE] Mutagenicity assessment in type 2 diabetes

Singh M, Nair V. Annals of Demo Medicine, 2024. PMID 90000018 | doi:10.0000/sample.1017

In patients with type 2 diabetes, genotoxicity and mutagenic potency were compared. Synthetic text for demonstration only.

[SAMPLE] Hepatotoxicity signal detection in type 2 diabetes & TGF-beta signalling

Rao A, Mehta V, Singh B et al. Synthetic Biology Letters, 2023. PMID 90000056 | doi:10.0000/sample.1055

In patients with type 2 diabetes, safety and hepatotoxicity were assessed. Synthetic text for demonstration only.

[SAMPLE] In vitro hepatotoxicity signal detection in rheumatoid arthritis & TGF-beta signalling

Mehta D, Verma V, Singh N et al. Synthetic Biology Letters, 2023. PMID 90000001

Background: Rheumatoid arthritis is a major burden. Methods: Safety and hepatotoxicity were assessed. Results: Synthetic results for demonstration only.

[SAMPLE] Mutagenicity assessment in prostate cancer

Sharma D, Das K, Sharma M et al. Synthetic Biology Letters, 2023. PMID 90000002 | doi:10.0000/sample.1001

In patients with prostate cancer, genotoxicity and mutagenic potency were compared. Synthetic text for demonstration only.

[SAMPLE] Mutagenicity assessment in prostate cancer

Nair R, Iyer N, Patel B et al. Journal of Sample Pharmacology, 2023. PMID 90000007 | doi:10.0000/sample.1006

In patients with prostate cancer, genotoxicity and mutagenic potency were compared. Synthetic text for demonstration only.

[SAMPLE] Mutagenicity assessment in asthma

Sharma V, Verma R. Archive of Mock Toxicology, 2022. PMID 90000009 | doi:10.0000/sample.1008

Background: Asthma is a major burden. Methods: Genotoxicity and mutagenic potency were compared. Results: Synthetic results for demonstration only.

[SAMPLE] Mutagenicity assessment in rheumatoid arthritis

Sharma M, Patel R, Singh R. Annals of Demo Medicine, 2022. PMID 90000026 | doi:10.0000/sample.1025

In patients with rheumatoid arthritis, genotoxicity and mutagenic potency were compared. Synthetic text for demonstration only.

[SAMPLE] Mutagenicity assessment in rheumatoid arthritis

Khan M, Nair S, Das K et al. Archive of Mock Toxicology, 2022. PMID 90000044 | doi:10.0000/sample.1043

In patients with rheumatoid arthritis, genotoxicity and mutagenic potency were compared. Synthetic text for demonstration only.

[SAMPLE] Hepatotoxicity signal detection in prostate cancer

Patel S, Patel M, Khan K et al. Archive of Mock Toxicology, 2021. PMID 90000006 | doi:10.0000/sample.1005

In patients with prostate cancer, safety and hepatotoxicity were assessed. Synthetic text for demonstration only.

[SAMPLE] Hepatotoxicity signal detection in prostate cancer

Nair M, Rao C, Singh D et al. Synthetic Biology Letters, 2020. PMID 90000050 | doi:10.0000/sample.1049

In patients with prostate cancer, safety and hepatotoxicity were assessed. Synthetic text for demonstration only.

[SAMPLE] In vitro hepatotoxicity signal detection in hypertension

Patel V, Mehta N, Verma R et al. Archive of Mock Toxicology, 2019. PMID 90000055 | doi:10.0000/sample.1054

In patients with hypertension, safety and hepatotoxicity were assessed. Synthetic text for demonstration only.

Biomarkers (5)

[SAMPLE] In vitro biomarker discovery in type 2 diabetes

Nair B, Das C, Iyer V et al. Journal of Sample Pharmacology, 2025. PMID 90000010 | doi:10.0000/sample.1009

In patients with type 2 diabetes, a prognostic biomarker signature was identified. Synthetic text for demonstration only.

[SAMPLE] Biomarker discovery in prostate cancer

Nair M, Singh M, Rao A et al. Example Clinical Reports, 2024. PMID 90000025 | doi:10.0000/sample.1024

Background: Prostate cancer is a major burden. Methods: A prognostic biomarker signature was identified. Results: Synthetic results for demonstration only.

[SAMPLE] Receptor signalling pathway in hypertension

Iyer K, Nair S, Nair M. Placeholder Bioinformatics, 2024. PMID 90000030 | doi:10.0000/sample.1029

In patients with hypertension, the mechanism of receptor signalling was dissected. Synthetic text for demonstration only.

[SAMPLE] Biomarker discovery in asthma

Khan V, Nair V, Nair S et al. Placeholder Bioinformatics, 2022. PMID 90000017 | doi:10.0000/sample.1016

Background: Asthma is a major burden. Methods: A prognostic biomarker signature was identified. Results: Synthetic results for demonstration only.

[SAMPLE] Biomarker discovery in hypertension

Mehta V, Sharma D, Verma B et al. Annals of Demo Medicine, 2021. PMID 90000059 | doi:10.0000/sample.1058

In patients with hypertension, a prognostic biomarker signature was identified. Synthetic text for demonstration only.

Mechanism & pathways (5)

[SAMPLE] Receptor signalling pathway in prostate cancer

Das M, Singh C, Singh A et al. Example Clinical Reports, 2025. PMID 90000031

In patients with prostate cancer, the mechanism of receptor signalling was dissected. Synthetic text for demonstration only.

[SAMPLE] Receptor signalling pathway in rheumatoid arthritis

Mehta R, Singh S, Khan N et al. Journal of Sample Pharmacology, 2024. PMID 90000038 | doi:10.0000/sample.1037

In patients with rheumatoid arthritis, the mechanism of receptor signalling was dissected. Synthetic text for demonstration only.

[SAMPLE] Receptor signalling pathway in type 2 diabetes

Patel S, Rao K, Khan S et al. Archive of Mock Toxicology, 2023. PMID 90000049 | doi:10.0000/sample.1048

Background: Type 2 diabetes is a major burden. Methods: The mechanism of receptor signalling was dissected. Results: Synthetic results for demonstration only.

[SAMPLE] Receptor signalling pathway in rheumatoid arthritis

Das A, Patel S, Patel K et al. Example Clinical Reports, 2022. PMID 90000053 | doi:10.0000/sample.1052

Background: Rheumatoid arthritis is a major burden. Methods: The mechanism of receptor signalling was dissected. Results: Synthetic results for demonstration only.

[SAMPLE] In vitro receptor signalling pathway in rheumatoid arthritis

Singh B, Nair K, Verma R. Example Clinical Reports, 2021. PMID 90000037 | doi:10.0000/sample.1036

Background: Rheumatoid arthritis is a major burden. Methods: The mechanism of receptor signalling was dissected. Results: Synthetic results for demonstration only.

AI / machine learning (7)

[SAMPLE] Biomarker discovery in asthma

Rao N, Sharma V, Khan V et al. Journal of Sample Pharmacology, 2024. PMID 90000020 | doi:10.0000/sample.1019

In patients with asthma, a prognostic biomarker signature was identified. Synthetic text for demonstration only.

[SAMPLE] Machine learning prediction in Alzheimer disease

Khan N, Rao S, Patel C et al. Synthetic Biology Letters, 2023. PMID 90000058 | doi:10.0000/sample.1057

In patients with Alzheimer disease, a random forest and deep learning model were trained. Synthetic text for demonstration only.

[SAMPLE] Receptor signalling pathway in asthma

Nair M, Nair B. Example Clinical Reports, 2023. PMID 90000021 | doi:10.0000/sample.1020

Background: Asthma is a major burden. Methods: The mechanism of receptor signalling was dissected. Results: Synthetic results for demonstration only.

[SAMPLE] Biomarker discovery in hypertension & TGF-beta signalling

Patel V, Sharma B, Mehta B et al. Synthetic Biology Letters, 2022. PMID 90000034 | doi:10.0000/sample.1033

In patients with hypertension, a prognostic biomarker signature was identified. Synthetic text for demonstration only.

[SAMPLE] In vitro biomarker discovery in asthma

Rao S, Khan V. Archive of Mock Toxicology, 2022. PMID 90000028 | doi:10.0000/sample.1027

In patients with asthma, a prognostic biomarker signature was identified. Synthetic text for demonstration only.

[SAMPLE] Machine learning prediction in prostate cancer

Rao S, Rao R, Khan R. Example Clinical Reports, 2021. PMID 90000013 | doi:10.0000/sample.1012

Background: Prostate cancer is a major burden. Methods: A random forest and deep learning model were trained. Results: Synthetic results for demonstration only.

[SAMPLE] Receptor signalling pathway in Alzheimer disease

Sharma S, Das A. Synthetic Biology Letters, 2021. PMID 90000027 | doi:10.0000/sample.1026
